**ENHANCED PROTECTIVE GLASS AUTOMOTIVE ASSOCIATION WEB SITE OFFERS
COMPREHENSIVE RESOURCE FOR AUTOMOTIVE INDUSTRY**

DETROIT, March 30, 2004 — The Enhanced Protective Glass Automotive Association (EPGAA) Web site, www.epgaa.com, is a leading source of enhanced protective glass information for OEMs, glass industry suppliers, media and the public. Key features include the latest product research, technical presentations, news releases and company newsletter.

The site also features links to automotive organizations that set safety standards and define testing procedures. In addition, visitors can view a list of vehicles that are currently equipped with EPG as a standard or optional feature, and receive answers to frequently asked questions regarding EPGAA's members and products. The members only section provides members access to vital information concerning the association.

"The EPGAA site serves as a valuable tool for sharing the latest testing results in an easily accessible format," said Michael L. Sanders, automotive marketing manager for DuPont Glass Laminating Products and EPGAA president. "Our goal is to inform and educate the automotive industry on security, safety, solar and sound benefits of EPG."

EPGAA WEBSITE LAUNCH – 2

EPG utilizes a plastic interlayer or film composite that is factory laminated to multiple glass layers. Developed specifically for use in the side and rear windows of automobiles, EPG provides four key benefits: security, safety, solar (ultraviolet and infrared) protection, and sound reduction and dampening.

The Enhanced Protective Glass Automotive Association (EPGAA) is composed of laminate and glass providers to share information and provide overall education on the development of high-impact resistant glass for added vehicle security, occupant comfort and safety. Currently, DuPont Automotive, Glasstech, Inc., Guardian Industries Corp., PPG Industries, Inc., Saint-Gobain Sekurit, Sekisui America Corporation, Solutia Inc., Southwall Technologies and Tamglass are members of EPGAA. For more information on the EPGAA, visit www.epgaa.com.
